NASPO Professional Development

CERTIFICATE PROGRAM FOR SECURITY PROFESSIONALS

NASPO International offers five comprehensive training programs to achieve the prestigious *Security Professional* **certification. See www.naspo.info for current training schedules.**

Security Awareness: 101

This class introduces basic security management concepts. In this class, you will learn how a security-based thinking skill can be developed and how you can engage your organization into applying the correct mind-set to secure your systems and facilities. This class uses both information sharing and interactive team skills. Duration: 1 day.

Security Standard Compliance: 102

This program is a detailed explanation of the ANSI NASPO Security Assurance Standard. Each section of the security standard is explained in detail with topics such as the different security certification levels, the nine security risk areas of the standard, mandatory and elective criteria, discussions on implementation techniques, self-audits, documentation, and the certification process. Duration: 1 day.

Protecting Electronic Data: 103

This program details the standard requirements for classifying and protecting Personally Identifiable Information (PIII) and Security Sensitive Information (SSI). This interactive program covers techniques to identity and classify information, identify threats to this information, implement IT security policies, computer controls, various Privacy Laws, and techniques to educate your company employees on the importance of PII & SSI protection. Duration: 1 day.

Security Assessment Analysis: 104

This interactive program teaches you the differences between threats, vulnerabilities and risks along with techniques for identifying, quantifying and analyzing. Implementation of controls to manage your vulnerabilities and risks. Duration: 1/2 day.

Confidentiality and Secrecy Practices: 105

This course is a comprehensive introduction to the various practices surrounding confidentiality, trade secrets, inside trading, antitrust, NSA/CDAs, rumor control, and other secrecy practices. Duration: 1/2 day.
