

SECURITY PROFESSIONAL DEVELOPMENT TRAINING

# PDT 104 Security Risk Treatments – Core Elements

#### **Course Overview**

This final course brings all the elements of the NASPO PDT training together to develop a framework for an organizational security risk management program.

In this interactive program you will learn how to use the risk assessment to develop the security treatments for the nine criteria stated in section 4 of the "ANSI NASPO SA 2015 Security Management Standard" and the three additional criteria from" ISO 14298:2013 Graphic technology -- Management of security printing processes" using techniques for identifying, quantifying and analyzing your security environment.

The ANSI/NASPO 2015 Security Management Standard presents internationally recognized best practices covering nine areas of threat: customers, material risk, physical intrusion, disaster recover, information, supply and custody chains, personnel and security breaches.

#### **Training Topics:**

- Flow from Risk Assessment to Risk Treatments
- Risk Treatments
- Section 1-9 of NASPO Security Risk Management Standard 2015
- Section 1-12 of ISO 14298
- Review of entire Risk Management Process

#### Who Should Attend:

Security Professionals seeking certification for their operations, Security Professionals seeking certification under the NASPO INTERNATIONAL CSP Program.
